dead bird millinery had reached a climax,

aud the ornithologists published a report

showing the appalling destruction of our

song birds to satisfy the demands of a

barbarous and demoralizing fashion.

The report says: "From carefully gath-

ered statistics it is proved that on the

nost moderate calculation 5,000,000 song

birds are annually required to fill the

demand for the ornamentation of the

bats of American women. The slaughter

is not confined to song birds; everything

that wears feathers is a target for the

bird butcher. In a single season 40,000

terns were killed at Cape Cod for ex-

portation, and the swamps and marshes

of Florida have been depopulated of

their egrets and herons. In one month
